

The sign Olive Branch has been waiting for.

METHODIST HEALTHCARE. COMING TO OLIVE BRANCH IN AUGUST.

Methodist Hospital in Olive Branch is here to keep your family and environment healthy for generations to come. The first LEED®-certified hospital in Mississippi, the state-of-the-art facility is being built with a high percentage of recycled materials and included technologies, designs and practices that bond closely with nature—such as geothermal pumps that cool and heat from deep-underground sources, Soladigm glass panels that reduce solar gain, and a mixed recycling plan that greatly reduces waste. It will even offer outdoor spaces that easily connect patients to their natural world. It is a long-anticipated vision of exceptional patient- and family-centered care, supported every step of the way by the people of Olive Branch. Bringing it to you is how Methodist treats you better.
